

## **IA9137 BALLOT DRAFT**

# **“GUIDANCE FOR THE APPLICATION OF AQAP 2110 WITHIN A 9100 QUALITY MANAGEMENT SYSTEM”**

## **SUPPORT MATERIAL FOR BALLOT**

January 2023

# Team Members & Scope of Publication

- IDS/IDR: Andreas SCHLAPP
- SDR (AAQG): Buddy CRESSIENNIE
- SDR (EAQG): Andreas SCHLAPP
- SDR (APAQG): None / *Tatsuya SHIRAI supports initiative Team as Requirements APAQG Rep.*

## ***SCOPE OF PUBLICATION:***

Unchanged from the previous release; a **publication** will take place in the **American** (AAQG) and **European** (EAQG) sectors.

APAQG/SJAC has no plan to publish the sector version of IA9137 so far.

# Rationale for change / Revision Goals

- Essential basis documents have been updated (9100, 9001 and AQAP-2110) since latest release of IA9137
- Align IA9137 to already published (partner) document AQAP-2110-SRD.2
- Ensuring of up-to-date cross-reference between IA9137 **AND** AQAP-2110-SRD.2 – “Identical content is published in IA9137 AND AQAP-2110-SRD.2”
- IA9137 is intended to provide guidance and assist an organization in the use and understanding between AQAP-2110 and 9100

# Introduction

- IA9137 (released 2010/2012) and “AQAP-2110-SRD.2” (updated/released in 2018) refer to each other and the same technical content is published in both documents
- Therefore it is urgent to align IA9137 to AQAP-2110-SRD.2
- IA9137: Scope of balloting is only *RATIONALE, FOREWORD, and APPENDIX A - ACRONYM LOG*
- Everything else is required to be common text with AQAP-2110-SRD.2 („technical content“)
- Based on this facts an approval to skip CD review was obtained

# Document Structure / Instruction for Ballot

## Note for this balloting process/review:

IA9137 has a “partner” document: AQAP-2110-SRD.2 with the same technical content that was developed in collaboration with NATO and IAQG.

Everything except **RATIONALE**, **FOREWORD**, and **APPENDIX A - ACRONYM LOG** is from AQAP-2110-SRD.2.

**That Text needs to remain as is:**

- **RATIONALE**
  - **FOREWORD**
  - INTRODUCTION / SCOPE
  - REFERENCES
  - GENERAL GUIDANCE
  - DETAILED GUIDANCE
  - **APPENDIX A – ACRONYM LOG**
- From “partner” document AQAP-2110-SRD.2 → LINK: [AQAP-2110-SRD.2](#)  
**That text needs to remain as is.**

# International Aerospace Quality Group – Revision Progress

## 9137 Guidance for the Application of AQAP 2110 within a 9100 Quality Management System

**Project Leader:**  
Andreas SCHLAPP (IDS)

**Date of last report:**  
29th Sep 2022

**Date of this report:**  
20th Jan 2023

**Current Status:**

**Strategy Stream Leader:**  
Alan Daniels

**Sector Document Reps:**

Buddy CRESSIONNIE (AAQG)  
None (APAQG) 1)  
Andreas SCHLAPP (EAQG)  
1) Tatsuya SHIRAI supports initiative Team as Requirements APAQG Rep.

**Initial Planned Completion Date:**  
(From IAQG 105.1 App B)

December 2022

**Current Estimated Completion Date:**

August 2023

### Project description / benefits:

**Goal** – Complete update/rewrite of this standard:

- 1) Align 9137 (from 2010/2012) to already published AQAP-2110-SRD.2 (2018) which is already based on updated fundamental standards (9100, 9001 and AQAP-2110).
- 2) Ensuring of up-to-date cross-reference between 9137 AND AQAP-2110-SRD.2 – “Identical content is published in 9137 AND AQAP-2110-SRD.2”

### Unresolved issues & decisions needed (if any):

### Recent accomplishments (since last report):

1. Develop/align 9137 to already published AQAP-2110-SRD.2 of all sections of the standard complete.
2. Approval to skip CD → go straight into Ballot process
3. [NATO-Standardisation-Office \(NSO\) has confirmed that NATO and SAE have a valid technical agreement](#)
4. [publication of IA9137 via new Single-Owner-Document \(SDO\) process by SAE](#)
5. [Intellectual Property \(IP\) issue solved and covered by publication via SDO process](#)

### Next steps (30-60-90 day look ahead):

- 1) [Initiate ballot process - run IA9137 as pilot according new SDO process](#)
- 2) [Sector ballot of draft standard](#)
