9131	QMS - Nonconformance Data Definition and Documentation
9132	Data Matrix Quality Requirements for Parts Marking
9133	Qualification Procedure for Aerospace Standard Parts
9134	Supply Chain Risk Management Guideline (Inactive)
9136	Root Cause Analysis and Problem Solving
9137	Guidance for the Application of AQAP 2110 within a 9100 Quality Management System
9138	Statistical Product Acceptance
9145	Advance Product Quality Planning (APQP) / Production Part Approval Process (PPAP)
9146	Foreign Object Debris (FOD)
9147	Management of Unsalvageable Items
9162	Aerospace Operator Self-Verification Programs

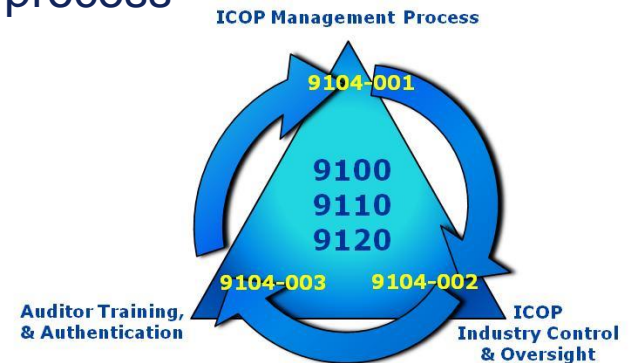

# IAQG Organisation

# What is ICOP?

- A process for accredited certification of an organisation's **Aerospace** Quality Management System (AQMS)
- **I**ndustry **C**ontrolled:
  - The IAQG ensures direct oversight of all AQMS certification activities
- **O**ther **P**arty:
  - Certifications are completed by accredited certification bodies (other parties) that are recognised through the ICOP process
  - **ICOP** is defined and controlled by the IAQG

# Why ICOP is Successful

- Globally harmonised and accredited certification scheme that is used and recognised globally by major Aviation, Space and Defence companies
- ICOP supports supplier approval activities with a recognised quality management system
- Uses the process approach to conformance assessment
- Focuses on meeting customer expectations

What our success looks like:

- **More than 18,000 AQMS certifications covering 25,000 sites**
- Recognition from authorities including:
  - Federal Aviation Administration (FAA) through FAA order 8120.12A
  - European Aviation Safety Agency through AMC to Part 21A.139(b)(1)(ii)
  - Defence Contracting Management Agencies in the USA and Germany

# Why ICOP is Successful

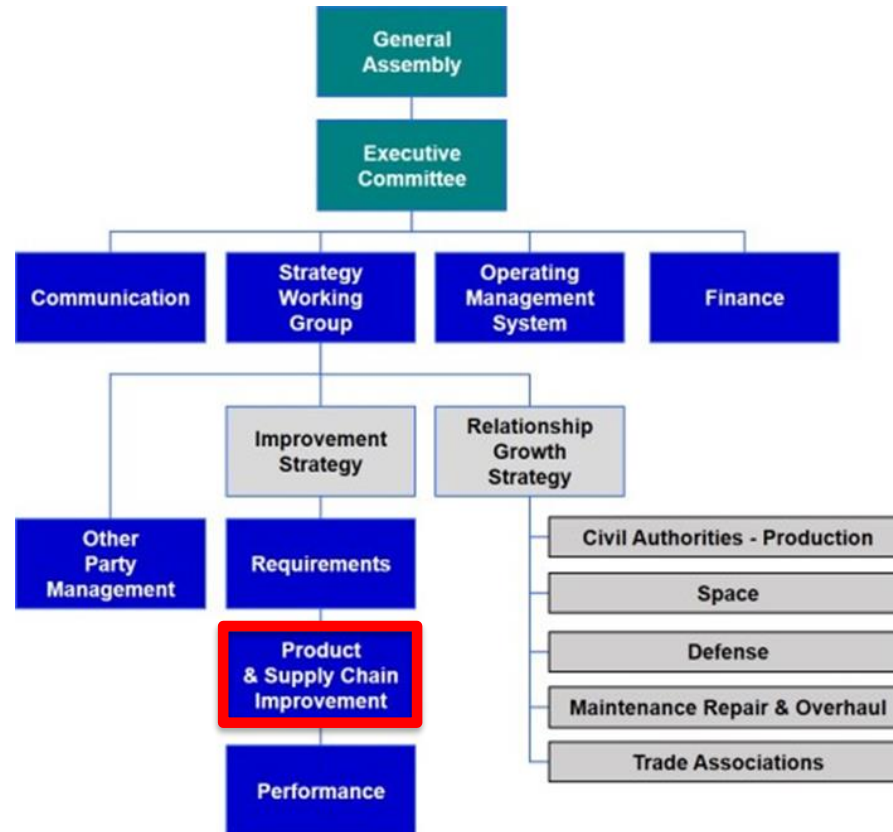

- The ICOP scheme is supported by the On-line Aerospace Supplier Information System (OASIS) database
- OASIS holds all of the information relating to AQMS certifications, audit results and details of participating stakeholders

## The Supply Chain Management Handbook

- The SCMh is a set of **guidance material and tools** developed by IAQG subject matter experts to help improving “On Time and On Quality” performance through out the entire supply chain
- It is available on **IAQG Website** to all levels of the supply chain
- Downloading of the guidance is **totally free**
- It is **continuously evolving** (new or revised sections)

The IAQG is an international non-profit association under the Belgian law with office registered in Brussels (Belgium).

The IAQG is a cooperative organization v of 3 sectors (Americas - AAQG, Asia/Pac

**Purpose**

- Establish and maintain a dynamic defense companies on initiatives performance and reductions in co
- Initial focus is to continuously imp consistently deliver high quality pr activities and costs.

**Objectives**

- Establish commonality of aviation documented” and “as applied”
- Establish and implement a proces life
- Establish methods to share best industry
- Coordinate initiatives and activite industry Stakeholders

**Mission**

The IAQG implements quality initiatives f product and services value stream. For that purpose, the IAQG:

# Strategic Objectives

- ❑ Deliver Improved Product and Service Quality through the Supply Chain
- ❑ Robust Product/Process Design and Effective Change Management
- ❑ Data Driven QMS Improvements to Predict and Prevent risks
- ❑ Stakeholders value the 9100 Series and Certifications
- ❑ Deploy an Operating/Resilience Plan Accelerating IAQG Product to Stakeholders
- ❑ Proactively Manage Partnerships to deliver IAQG Goals and Offerings

**FOCUS ON BUSINESS SCOPE**

**FOCUS ON IAQG ENABLERS**
