

9163 STANDARD CERTIFICATE OF CONFORMANCE REQUIREMENTS INITIATIVE SUMMARY

06 Jan 2021

Rationale for the standard

“Certificate of Conformance Requirements”

- The AS&D customers over the world receive numerous products (assemblies, sub-assemblies, parts, material, etc.) or services that are produced or performed by other organizations (external providers / suppliers) with a Certificate of Conformance (CoC).
- The high number of customers and suppliers may result in a multiplication of Certificate of Conformance requirements and associated templates.
- The objective of this standard is to provide guidelines about how to issue such Certificate of conformity, harmonize its content between all suppliers and customers, and provide a consistent process and documentation requirements for verification of AS&D products.
- This “Supporting Standard” takes into account Lesson Learnt from users of the SCMh native guidance.
